## **Professional Experience**

### **Fullstack Software Developer — Leavecode Technologies (1.8 Years)**

Developed and maintained production-grade mobile applications using React Native for Android and iOS platforms.

Integrated In-App Purchases (IAP) for subscription-based and one-time purchase flows.

Implemented secure payment integrations and handled transaction validation.

Worked extensively with WebSockets to enable real-time features such as live updates and in-app messaging.

Built and integrated backend APIs using Express.js and managed admin dashboards.

Led the mobile development team and contributed to architectural and technical decisions.

Collaborated closely with designers, backend engineers, and QA to deliver stable releases.

## **Projects**

### **AC5D Construction – Mobile App**

Tech Stack: React Native, Express.js

Connects customers with verified general contractors and real estate professionals.

Allows users to browse contractor profiles, view property listings, and post project requirements.

Supports real-time chat, project tracking, and secure data transmission.
